† *Corse, course, v.* *Obs.* or *dial.* [Of uncertain origin.]

In sense it is identical with *Coss* v., being the usual English form while *coss* is mostly Sc.; this, with the fact that both *coss* and *course* certainly go back to an early date, makes it almost impossible to consider them as mere phonetic variants arising from the vocalization of *r* in *corse*, or the insertion of *r* into the spelling of *coss*. It is, however, in favour of their identity that there is a third verb, *Scorse*, variously written *skoarse*, *skoce*, *scourse*, *scource*, synonymous in meaning with *corse* and *coss*; and that it has both *scorsonare* and *scorsonare* 'to corse or trucke horses with a horse-coarce' (Florio.)

1641 S. SMITH *Herringbuss Trade* 7 The Corved Herring, which are to make red Herrings, are those that are taken in the Yarmouth seas, provided that they can be carried on shore within 2 or 3 days after they are taken, otherwise they must be pickled. The Corved Herrings are never gipped but rowed in salt, for the better preservation of them, till they can be brought a shore, and if any be preserved for to make Red-herrings, they are washed out of the pickle before they are hanged up in the Red-herring houses. 1641 — *True Narr. R. Fishings* 4 For the latter Fishing, if Corved Herrings, the best vent of them is at Yarmouth, to make red Herrings. Hence, c. 1680 in J. COLLINS *Making of Salt* 106; and 1797-51 CHAMBERS *Cycl.* s.v. *Herring*.

[App. the same as MDu. *korsharink*, mentioned under CORVE, of which the exact sense is equally obscure. A suggestion is that, as *tonkaring* is barrelled herring, *korsharink* may be herring not barrelled, but brought ashore in baskets. *Corved* would then be 'put in a corf or corves'.]

P In the *Dict. Rusticum* 1704, the quot. from S. Smith is given, s.v. *Herring-fishery*, with 'corved' misprinted 'corred'; whence ASH 1775 has the spurious 'Corred' (in the herring fishery) rolled in salt, prepared for drying, which has been mechanically repeated in many subsequent Dictionaries: some of the most recent invent a fictitious vb. trans. 'Corr, to roll herrings in salt and prepare them for drying'.

Prof. Skeat (*Trans. Philol. Soc.* 1889) has suggested that it is the same word as OE. *co-sæt* cot-sitter, dweller in a cot, cottar; cf. the Domesday forms, pl. *coscez*, *cosets*, *cozes* (= *co*). This is phonetically satisfactory, and the sense of 'lamb dwelling in a cot' or 'kept by a cot-sitter or cottar' finds support in It. *cascio* a tame lamb bred by hand, f. *casa* house; Ger. *hauslamm* house-lamb and 'pet', is analogous. Cf. also *Cotts*, lambs brought up by hand, cades, Marshall *Rural Econ. E. Norfolk*, 1879 (whence in Grose 1790). There is however a long gap between the *coscez* of Domesday and the *cosset* of 1579, during which no trace of the word in either sense has been found.]

The construction of this verb is idiomatic, and for its analysis it is necessary to go back to Latin. *Hoc constitit mihi tribus assibus* was literally 'this stood (to) me in three asses'. The dative of the person has in Eng. become an indirect object, to being never expressed; the Lat. locative (ablative or genitive) of the amount or price became a simple object in French, and remains an adverbial object in English, *in* being never expressed. Hence a natural tendency to view the noun ex-

pressing the price as a simple object, and the verb as transitive. That it is yet really intransitive is shown by the fact that it has no passive either with the price or the indirect object as subject; 'this cost me nothing' cannot be changed into 'nothing was cost me by this,' or 'I was cost nothing by this'. The adverbial adjunct may also be expressed by an adverb as *much, little, more, less, dear(ly)* (cf. *L. carius constat*): even here the tendency is to look upon *much, little*, etc. as adjs. used substantively.]

1. A kind of apple of large size.

Often mentioned from 14th to 17th c., after which the word passes out of common use, though still retained by fruit-growers in the name of one or more varieties of apple identical with or derived from the original *Costard*. The latter is described by R. Hogg, *British Pomology* 1853, as a large apple, distinctly five-sided, having five prominent ribs extending into the basin of the eye, and forming ridges round the crown. A Kentish grower who has *Martin's Costard*, describes it in May 1892, as 'a very large apple, shape oval, very much ribbed, a strong grower, bearing every other year.'

Ray describes both the *Catshead* and *Costard* as distinct, and Leonard Meager enumerates three varieties of *Costard* in his list—the white, grey, and red.

*Cost-book* (kɒstbʊk), *Mining*. [f. *Cost sb.* 2 + *Book*.] A book containing an abstract of all costs and expenses incurred in working a mine, and of all returns from sales, etc., with a balance of profit or loss.

By the Stannaries Act, the Cost-book must be made up and laid before the Shareholders at least once in every 16 weeks, and the term 'cost-book' is defined to include all the subsidiary books kept in the mine. Hence *Cost-book Company*, a kind of partnership formed to work a *Cost-book Mine* on the *Cost-book System*, according to which any partner is at liberty to withdraw after such periodical settlement of accounts, without further liability.

The form with *tt* found in Northumbrian is also in Rhenish dialects of G. from 14th c. *kotte*, but the gemination is not original, and merely marks the short vowel. From the same root came OE. *cýte*, *cēte*, prop. *cēte cot*, cell, chamber whence app. ME. *chute* := OTeut. \**kautōn*, in which *kaut* is in ablaut relation to *kut*.]

1. A small house, a little cottage; now chiefly poetical, and connoting smallness and humbleness, rather than the meanness and rudeness expressed by *hut*.

In OE. used more widely for 'cottage, house, bed-chamber, den'. Sparingly represented in ME., in which *cote* and, later, *cottage* were more frequent terms. *Cote* in this sense having become obs. or merely dial., about 1625, cot has been revived as a poetical and literary term.

1. A dwelling-house of small size and humble character, such as is occupied by farm-labourers, villagers, miners, etc.

Historically the term is found first applied to the dwelling-places or holdings which under the feudal system were occupied by the cottars, cottiers, cotsets, or cotterells, and by the labourers of a farmstead; dwellings for the labouring classes in rural and urban districts were, under this name, the subject of various legal enactments, such as 31 *Edw. c. 7*, 15 *Geo. III. c. 32*, etc., and, when under a certain rental, were exempted from paying church-rate, poor-rate, etc.; with the disappearance of legal regulations and exemptions, and under the influence of 4, the term has become more vague in its application.

**Cottar**, *cotter* (kɒtə). [Partly ad. med.L. *colarius*, f. *cola* cot; partly a later formation from *COT sb.* + -AR 3, -ER 1.]

1. Sometimes used to translate med.L. *colarius*, applied in Domesday Book to a villen who occupied a cot or cottage with an attached piece of land (usually 5 acres) held by service of labour (with or without payment in produce or money).

*Colarius* probably represented the OE. *cotsa* or *cotset*, *cotsella*, and *cotman*, or at least, with the *bordarius*, included these. The distinction between the *colarius* and the *bordarius*, *bordar*, or *bordman*, has not been satisfactorily determined; when both are mentioned together the *bordarii* are usually named before the *colarii*, and the latter are much less numerous. In some cases, also, Domesday seems to distinguish *coces* and *cottarii*: thus under the manor of Haseberie, Wiltshire, there are 'xiii coces, and ii cottar'. In Ellis's Abstract of Population in Domesday (II. 435 6), Devonshire has *bordarii* 4847... *coces* 70, *cottarii* 19. *Serv.* 3244, *villani* 6070.

**Cotter** (kptér), *sb.*2 [See *COTTEREL* sb.] A pin, key, wedge, or bolt which fits into a hole and fastens something in its place.

[In Branch I, repr. OF. *cuncile*, ONF. *concille*, = L. *concilium* (of *con-* together + *cal-* to call) a convocation, assembly, meeting, union, connexion, close conjunction; sometimes an assembly for consultation, in which sense it became confused with *consilium* an advisory body (though the confusion was perh. in most cases due to later scribes of MSS.). In mediæval times *concilium* was mainly appropriated to the assemblies convoked to settle points of doctrine and discipline in the Church, or the relations between Church and State in particular countries, — the *Councils*. An early L.-Gr. Gloss. in Du Cange has *Concilium*, *συνέδριον*, *συμβούλιον*, *συνόδος*; and an ancient Codex of the Canons quoted by him has 'Synodum autem ex Græco interpretari Comitatum, vel Cœtium; Concilii autem nomen tractum ex more Romano'. In OF. *consilium* came down as a living word in the form *conseil*, while *concile* (*concire*) was used for the ecclesiastical *concilium*, which sense it still exclusively retains. In English, the two words were, from the beginning, completely confused: *conseil* was frequently spelt *conceil*; *concile* was spelt *consile* and *conceil*; and the two words were treated as one, under a variety of forms, of which *counseil*, later *counsel*, was the central type. In the 16th c. differentiation again began: *counceil*, later *council*, was established for the ecclesiastical *concilium*, *F. concile*; and this spelling has been extended to all cases in which the word means a deliberative assembly or advisory body (where L. has *consilium*, *Fr. conseil*), leaving *counsel* to the action of coun-

selling and kindred senses. The practical distinction thus established between *council* and *counsel* does not correspond to Latin or French usage.]

\* I. Uses derived from *L. concilium*.

2. *spec.* An assembly of ecclesiastics (with or without laymen) convened for the regulation of doctrine or discipline in the church, or, in earlier times, of settling points in dispute between the ecclesiastical and civil powers. [The only sense of *F. concile*.]

Various qualified according to its sphere, as *ecumenical*, *general*, *national*, *patriarchal*, *primalial*, *provincial*, *diocesan* (this = synod). Without qualification, usually applied to *general councils*, i.e. those called together by an invitation to the church at large, and claiming to speak in the name of the whole church, whether ultimately accepted as doing so (*ecumenical*) or not. In early times *general council* was used less definitely, e.g. for a national or provincial council. In the Middle Ages there were also *mixed councils*, which met to settle both spiritual and civil affairs.

3. In the New Testament, regularly used to render Gr. *συνέδριον*, Vulg. *concilium*, chiefly in reference to the Jewish Sanhedrim, or a meeting of that body.

[In the MSS. and printed texts of the Vulgate, *concilium* and *consilium* are often confused; in Acts xxv. 12 the Clementine text has *concilio*, followed by the English versions, including 1611 and 1881, with *council*; but the oldest MSS. have *consilio*, the proper rendering of *συνέδριον*. The Anglo-Saxon Gospels usually represent *concilium* by *gemot*, but they, as well as the versions of the Psalter, have sometimes *sepeakt*, 'counsel, advice', implying that the translator had *consilium* before him in the Latin, e.g. in Mark xiv. 55 (where *consilium* is actually the reading of important MSS. written in Ireland and England. In Matt. xii. 14, *συνβούλιον* ἐλάβον, is rendered in the Vulgate *consilium faciebant*, for which Tindale, Cranmer, and version of 1611 have 'held a counsell'; current editions of 1611 have 'held a council', 1881, correctly, 'took counsel'.]

occasional general assemblies of the barons or peers in later times. Also used of similar national assemblies of other countries, as the Cortes of Spain or Portugal.

The last *Great Council* in England was that summoned by Charles I at York in 1640, after the practice had been long disused. The name, though proper to the assembly, is sometimes given to its constituents as a permanent body: cf. sense 6. So *General or National Council*.

1. A title of nobility in some European countries, corresponding to the English title *EARL* (by which in earlier times it was always translated).

In reference to Roman History, it translates L. *comes*, as in *Count of Britain* (*Comes Britannia*) and *Count of the Saxon Shore* (*Comes Littoris Saxonica*); two of the generals of the Roman province of Britannia in the 4th century.

**Counter-**, *prefix*:—ME. and AF. *contre-*, a. F. *contre-* (= Pr. It. *contra-*):—L. *contrā* *adv.* and

prefix (see CONTRA-) against, in return. The form in which the Lat. prefix has come down through Fr. into Eng. Used in words actually adopted from earlier F., as *counterbalance*, *counterchange*, *counterfeit*, *countermand*, *countermarch*, *countermark*, *countermure*, *counterpoise*, *counterseal*, *countersign*, etc., and their derivatives; also in adaptations of later F. or Italian words in *contre-*, *contra-*; and in many words formed after them in English. *Counter* has thus become a living element of the language, capable of entering into new combinations even with words of Teutonic origin. It may be prefixed, when required, to almost any substantive expressing action, as *motion*, *counter-motion*, *current*, *counter-current*, or even to any word in which action or incidence is imputed, as *measure*, *counter-measure*, *poison*, *counter-poison*. Hence it is often viewed as an independent element, written separately, and practically treated as an adjective: see COUNTER *a.*

In those compounds which we have taken from French or Italian, the consolidation of the word is usually greater than in those formed in English, and they are regularly written as single words, as *counterbalance*, *counterfeit*, *countermarch*, though sometimes with the hyphen. The stress is normally, in verbs and their derivatives, on the root, in nouns and their derivatives, on the prefix: cf. *to undergo*, *undertone*. But there are exceptions, esp. where the noun stress is taken by a verb of the same form, as in *to counterfeit*. In words formed in English the two elements are in looser union, both accentually and in writing. In verbs the rhetorical or antithetical stress on the prefix may be equal to, or even for the nonce stronger than, that normally on the root, as in *to plan* and *counter-plan* (*counter-plan*), and the two parts are properly hyphenated. In nouns, when the *counter-* word is contrasted explicitly or implicitly with the simple word (as in 3, 4, 5), the predominant stress of the prefix is strongly marked, as in *counter-cheer*, *counter-announcement*. These are properly written with the hyphen (now rarely as a single word, but occasionally in two separate words). When such a contrast is not distinctly present (as in 6, 9), the predominance of the prefix is less marked, and the root-element may receive an equal or greater stress; in such case there is a growing tendency to write the prefix as a separate qualifying word, and in fact to treat it as an adjective. Thus *counter-side*, *counter-truth*, become *counter side*, *counter truth*: see COUNTER *a.*

All permanent compounds in *counter-*, with some of the more important of the looser combinations, are given in their alphabetical order; of the casual combinations (many of them nonce-words) of obvious meaning, examples here follow.

*I. 1. verbs*, as COUNTERACT, COUNTER-MAKE, COUNTER-SAY, COUNTERWEIGH, COUNTER-WORK, with their derivatives: which see in their alphabetical places. Also many nonce-words, either contextual, or framed as literal equivalents of French or Italian verbs in *contre-*, *contra-*, expressing the doing of a thing or performance of an action in the opposite direction or sense, with a contrary effect, or in opposition, retort, or response to the action expressed by the simple verb; sometimes with the notion of rivalling or out-doing, checking or frustrating that action; sometimes merely in reciprocity. Such verbs were formerly more frequently formed and used than now. Examples: *counter-address*, *counter-advise*, *counter-affirm*, *counter-ambush*, *counter-avouch*, *counter-beat*, *counter-bid*, *counter-bore*, *counter-cross*, *counter-dance*, *counter-dig*, *counter-fix*, *counter-gird*, *counter-judge*, *counter-lock*, *counter-meet*, *counter-petition*, *counter-plan*, *counter-please*, *counter-post*, *counter-pray*, *counter-preach*, *counter-prick*, *counter-refer*, *counter-ruin*, *counter-shine*, *counter-state*, *counter-swear*, *counter-thwart*, *counter-traverse*, *counter-tug*, *counter-vote*. A rare sense in English is that of 'across, cross-', as in *counter-dash*, *counter-strike*; COUNTER-BAR, -HATCH. (These are hyphenated, but were formerly often written entire. The main stress is on the verb.)

7. Law. Applied to a jury.

In 12-14th c. a jury was a body of witnesses summoned to decide by their sworn testimony (*verdictum*, verdict) some question debated between litigants who had formally agreed to be bound by that testimony. The jury being summoned from the neighbourhood (hundred) in which the controverted facts were supposed to have taken place, the question was said to be tried by the neighbourhood (*L. vicinium, viciniam*, Fr. *vicinet*; or by the 'country' (*L. patria*, Fr. *pays*). The litigants were said to put themselves upon the, or their country, and trial by the country was distinguished from other modes of trial. The phrase has been retained to the present day, when accused criminals still formally submit to trial 'by God and their country', although the character of trial by jury has been greatly changed. (*F. W. Maitland*.)

2. One of the territorial divisions of Great Britain and Ireland, formed as the result of a variety of historical events, and serving as the most important divisional unit in the country for administrative, judicial, and political purposes.

The AF. *counté* and the med. L. *comitatus* were used to render the English SHIRE, the division of the country administered originally by an *eorl* and later by a *sheriff* (AF. *riscounté*); whence *counté* was gradually adopted in English (app. scarcely before the 15th c.), as an alternative name for the *shire*, and in course of time was applied to the similar divisions made in Wales and in Ireland, as well as to the shires of Scotland, and also extended to those separate portions of the realm which never were shires, as the duchy of Cornwall, Orkney and Shetland, etc.

b. The status of county was also given at various times to a number of cities and towns in England and Ireland, with a certain portion of adjoining territory; these were separated from the shire in which they were situated, and made counties by themselves; more exactly called *corporate counties* or *counties corporate*: see CORPORATE ppl. a. 4.

c. By the Local Government Act of 1888 the word has received a further modification of meaning; besides the historical counties, and counties corporate, boroughs of above 50,000 inhabitants are made administrative counties under the name of *county boroughs*, which are administratively, but not politically or judicially, independent of the counties in which they are situated.

3. Introduced into most of the British colonies as the name of the administrative divisions; in the United States, the political and administrative division next below the State, into which all the States of the Union are divided, except South Carolina, of which the divisions are called 'districts', and Louisiana, which is divided into 'parishes'.

This was perhaps the earliest sense in which *counté* was used in English. It was a regular use of Anglo-Lat. *comitatus* and AF. *counté*; app. no such phrases as *curia de comitatu*, or *court du counté*, being in use. Business was done in *pleno comitatu*, *en plein counté*, a man was not outlawed until he had been 'exacted' in *quatuor comitatibus*; he must be exacted de *comitatu* in *comitatu*, etc.

The name and system of Coupons was introduced by the late Mr. Thomas Cook in 1864.

c. A section or subdivision of the area of an Exhibition building, a museum, or the like, open above (to the general roof), and usually devoted to the products of a particular country, or department of science, art, or industry.

This application of the word appears to have originated in the structure of the building in Hyde Park for the Great Exhibition of 1851. The rows of pillars supporting the roof, which crossed each other at right angles, divided the central area into a number of rectangular sections; these being themselves open to the lofty roof, while bordered on two sides by galleries supported by the pillars, suggested courts within buildings, and soon received the name; the term was further extended in the Crystal Palace at Sydenham (as in the Alhambra, Egyptian, Pompeian, and Renaissance Courts), and in later Exhibitions has been used with still greater extension; it has also been, with more closeness to the original notion, applied to the central open area of a museum, surrounded by its arcades and galleries.

1851 *Illustr. Lond. News* 3 May 364/1 The very nature of the construction of the building suggests its subdivision into courts; and this is distinctly illustrated in the plan of the gallery... there are four of these large courts, and two smaller ones, parallel with the transept in each of these western divisions of the Building... from the gallery these courts form a most interesting feature in the arrangements. *Ibid.* 31 May 404 The Tunis Court. *Ibid.* 405 The Canadian Court... II. A princely residence, household, retinue.

5. The place where a sovereign (or other high dignitary) resides and holds state, attended by his retinue.

This sense is said to have arisen in Old French, the name *court* being applied to the residences of the early Frankish kings on their rural domains: see LITTRÉ, and cf. sense 2. But the actual history is involved in obscurity from the paucity of early evidence.

III. An assembly held by the sovereign.

9. A formal assembly held by the sovereign at his residence: in early times, of his councillors and great lords, for purposes of administration; in later times to give state receptions, audience to ambassadors, and the like. The early use has

given rise to the 'high court of parliament' (sense 10), and 'the king's courts' of justice (sense 11); the modern use is naturally associated with senses 6, 7, as in *to be presented at court*.

1554 O. E. Chron. (Laud MS.), And [Henri] held þær [in Lundene] micel curt. 11. An assembly of judges or other persons legally appointed and acting as a tribunal to hear and determine any cause, civil, ecclesiastical, military, or naval.

Justice was in early times administered in assemblies held by the sovereign personally (sense 9), then by judges who followed the king as officers of his court; hence the title *the King's Courts* (*curia regis*).

In this sense more fully defined as *court of law, law-court, court of justice, of judicature*. These are distinguished as *superior* or *inferior*, according to their respective rank, the highest court of a country or state being called the *Supreme Court*. *Court of first instance*: a court in which a matter must first be tried, as distinguished from a *court of appeal*, to which it may subsequently be carried. *Court of record*: see quot. 1765.

**Court-baron.** [a. AF. *court baron*, earlier *court de baroun*; in med.L. *curia baronis*, court of the baron or lord.] The assembly of the freehold tenants of a manor under the presidency of the lord or his steward.

Such a court had a jurisdiction in civil actions arising within the manor, especially in such as related to freehold land. This jurisdiction began to decay at an early date, and is now practically obsolete. (In modern times lawyers have distinguished between the *court-baron* which was the court of the freehold tenants, and the *customary court* which was the court for the copyhold tenants. The early history of this distinction is obscure. F. W. Maitland.)

[app. an early ME. repr. of an OE. *cūp utlaga* known outlaw.] A term applied, according to Bracton, to a person knowingly harbouring or concealing an outlaw; or perhaps, more properly, to the offence of doing so.

c 1250 *BRACTON* iii. ii. xiii. (Rolls) II. 336 Talem [exulem] vocant Angli utlaghe. ([Utlagus] aut potest esse notus et cognitus vel ignotus et incognitus; et unde qui notum et cognitum receptaverit pari poena puniendus est, qui dicitur Couthutlaughe [MSS. v. rr.: see above]. 1607 *COWELL*

*Interpr.*, *Couthutlaughe* is he that willingly receiveth a man outlawed, and hideth him. [Hence, 1641 in *Termes de la Ley*, 1696 *BLOUNT*, and later Dicts.]

[Known only in loc. cit.; the OE. term represented is not recorded. It is not easy to comprehend that the term 'known outlaw' could originally designate the harbourer; prob. the word is the fragment of a phrase designating the harbouring of a known outlaw; it has been suggested that the meaning might be 'acquaintance or familiar of an outlaw', but this would be in OE. *utlaga cūpa*, or perh. *cūpa utlaga*.]

+ **Couvade** (kū'vād). [a. obs. F. *couvade*; f. *couver* to hatch: see next. Cotgr. (1611) has *couvade* = *covrē* (COVER) or *couverment* (brooding, sitting on eggs); whence the derisive phrase, *faire la couvade* 'to sit cowering or skowling within doors, to lurk in the campe when Gallants are at the Battell'.] A term applied by some writers to the 'man-childbed' attributed to some uncivilized or primitive races, and extended to comprehend a series of customs according to which, on the birth of a child, the father performs acts or simulates states natural or proper to the mother, or abstains for a time from certain foods or actions, as if he were physically affected by the birth.

1865 *TYLOR* *Early Hist. Man.* x. 288 One of these practices has an existing European name, the *couvade*, or 'hatching', and this term it may be convenient to use for the whole set. *Ibid.* x. 294 The country... where Marco Polo met with the practice of the *couvade* in the thirteenth century, appears to be the Chinese province of West Yunnan. 1871 *YULE* *Marco Polo* Note 3 to ii. l. 57 This highly eccentric practice has been fully illustrated and explained by Mr. Tylor under the name of the *Couvade* or Hatching, by which it is known in some of the Béarn districts of the Pyrenees.

[Fr. *couvade* (in R. Etienne 1543, Ph. Monet 1626) was a word of the same class as *cruisade* CRUSADE, in which the suffix -ade, adapted from Fr. and Sp. -ada, It. -ata, is substituted for the cognate F. -de, from L. -ata: see -ADE. It was thus etymologically a doublet of *covrē*, *covey*. As applied to men the phrase *faire la couvade* appears to have been merely derisive. The recent application of the word in anthropology is due to Dr. E. B. Tylor, following M. Francisque Michel *Le Pays Basque* (1857) 201, where the 'man-childbed' attributed to the Basques and Béarnese, is said to be so called by the latter. But this is a mistake, traceable to a statement as to the phrase *faire la couvade*, in *Rochefort's Hist. Naturelle et Morale des Antilles* (1658) 494-5, repeated with variations by a sequence of later writers. It is not true that *couvade* was ever a name for the practice in Béarn; the Béarnese *coade* is simply = F. *covrē*, a covey of chickens. Further, the pretended existence of the practice in Béarn and among the Basques appears to be merely the echo of a statement of Strabo as to the ancient Celtiberians, loosely repeated by one compiler after another as a commonplace of history. (See *Academy* 29 Oct., 5 and 19 Nov., 10 and 17 Dec. 1892.)]

[The Heb. word בְּרִית *berith* is also the ordinary term for a contract, agreement, alliance, or league between men. It is constantly rendered in the Septuagint by διαθήκη 'disposition, distribution, arrangement', which occurs in Aristophanes in the sense 'convention, arrangement between parties', but usually in cl. Gr. meant 'disposition by will, testament'. Accordingly, the Old Latin translation of the Bible (Itala) appears to have uniformly rendered διαθήκη by testamentum, while Jerome translated the Heb. by *testamentum* and *pactum* indifferently. Hence, in the Vulgate, the O. T. has the old rendering *testamentum* in the (Gallican) Psalter, but Jerome's renderings *testamentum*, *pactum* elsewhere; the N. T. has always *testamentum*. In English Wyclif strictly followed the Vulgate, rendering *testamentum*, *pactum*, by *boond*, *covenauant*, rather indiscriminately, *testamentum* in the Psalter and N. T. always by *testament*. So the versions of Rheims and Douay. The 16th c. English versions at length used *covenant* entirely in O. T. (including the Psalter), and Tindale introduced it into 6 places in the N. T. These the Geneva extended to 23, and the Bible of 1611 to 22 (in 2 of which Gen. had *testament*), leaving *testament* in 14 (in 3 of which Gen. had *covenant*). The Revised Version of 1881 has substituted *covenant* in 12 of these, leaving *testament* in 2 only (Heb. ix. 16, 17).]

Thus בְּרִית, *berith*, *testamentum* (*pactum*), *covenant* are applied to God's engagement with Noah and his posterity, Gen. vi. 18, ix. 9-17; to that made with Abraham and his posterity, Gen. xvii. of which the token was circumcision; to the institution of the Mosaic Law, Exod. xxiv. 7, 8, and to that law or its observance itself, whence the expressions *book of the covenant* (i.e. of the law), *ark of the covenant*, *blood of the covenant* (i.e. of beasts ritually sacrificed), *land of the covenant* (=promised land, Canaan). The covenant with the Israelites, in its various phases, is commonly called the *Old Covenant*, in contrast to which the prophets made promise of a *new covenant*, Jer. xxxi. 31; and this name נְאֻם יְהוָה *New Covenant* (*testament*) was, according to St. Luke xxii. 20, applied by Jesus to the new relation to man which God had established in Him. In this sense it is also used by St. Paul and the writer of the Epistle to the Hebrews, who contrast these two covenants (Gal. iv. 24, Heb. viii. 13, ix. 15, etc.), also called by commentators the *Temporal* and the *Eternal Covenant* (cf. Heb. xiii. 20).

Heb. viii. 8, I shal make with the house of Israel and with the house of Iuda a new couenauant [earlier versions testament]. 1611 BIBLE *Ex.* xxxiv. 28 And he wrote vpon the Tables the words of the couenauant, the ten Commandments. — Heb. viii. *Reading*, And the temporal Couenauant with the Fathers [is abolished] by the eternal Couenauant of the Gospel. *Ibid.* xii. 24 The mediator of the new Couenauant [margin testament]. 1667 MILTON *P. L.* xi. 892 And makes a Couenauant neuer to destroy The Earth again by flood. 1779 COWPER *Olney Hymns*, Oh, how I love thy holy word, Thy gracious couenauant, O Lord! 1828 J. BENSON *Bible w. 8. *Theol.* a. *Covenant of Works*, *Covenant of Grace*: the two relations which are represented as subsisting between God and man, before and since the Fall.

The *Covenant of Works* (or of *Life*) was made with Adam for himself and his posterity upon condition of obedience; the *Covenant of Grace* (or of *Redemption*) with 'the Second Adam' and with his elect in him, for their deliverance from the misery and penalty into which they had fallen through transgression of the covenant of works. The theology of the covenants, or Federal Theology, was first elaborated by Koch or Cocceius (1603-1669); and attained great vogue in the 17th c., esp. among the Puritans. It is prominently developed in the Westminster Confession of Faith, and its accompanying Catechisms.

9. *Eccles. & Sc. Hist.* The name given to certain bonds of agreement signed by the Scottish Presbyterians for the defence and furtherance of their religion and ecclesiastical polity.

The *National Covenant* was signed at Edinburgh on 28 Feb. 1538 for the defence of Presbyterianism against the Episcopal system that had been introduced by James I and Charles I. The *Solemn League and Covenant* was accepted by the General Assembly of the Church of Scotland on 17 Aug. 1643, and by the Westminster Assembly of Divines, and English Parliament, on 25 Sept., as a league between England and Scotland on the basis of the establishment of Presbyterianism in both countries. It is to the latter especially that the name usually refers. It is sometimes given also to the Bonds subscribed at Edinburgh by

the Lords of the Congregation and their followers on 3 Dec. 1557, and at Perth on 31 May 1559, the object of which was the carrying out of the Protestant Reformation.

In this particular case, the use of the gen. pl. *cūna*, *cýna* (in 12th c. *cune*, *kyne*) with numerals (see 1 b β below), may have contributed to the prevalence of the *kýn*, *kyne* form.]

The precise reference to *tail* is uncertain: it may be to an animal 'turning tail' in flight, or to the habit in frightened animals of drawing the tail between the hinder legs: cf. the Heraldic use in sense B 2. It is notable that in the Old French version of *Reynard the Fox*, *Coart* is the name of the hare: this may be a descriptive appellation in reference to its timidity; but it is also possible that the hare was so called originally from its tail or 'bunt', so conspicuous as the animal makes off, and that the name was thence transferred to 'hearts of hare'.

1. A garment with a hood (*vestis capitiata*), worn by monks, varying in length in different ages and according to the usages of different orders, but 'having the permanent characteristics of covering the head and shoulders, and being without sleeves' (*Cath. Dict.*). † Also, formerly, a cloak or frock worn by laymen or by women.

The cl. Lat. *cucullus* was the hood of a cloak, covering the head only. The cowls of the early Egyptian monks covered the heads, and barely reached the shoulders; by 800 the cowls of monks had become so long as to reach their heels, when St. Benedict restricted their length to two cubits. In the 14th c. the cowl and the frock were often confounded; but it was declared at the Council of Vienne 'we understand by the name of *cuculla* a habit long and full, but not having sleeves, and by that of *flocus* a long habit which has long and wide sleeves'. See Du Cange s.v. *Cuculla*.

The earliest trace of the word appears to be in the derivative *coosener* in Awdelay's *Fraternalite of Vocabularies*, 1561 (see COZANER); it is not improbable that it arose among the vagabond class. It has generally been associated with *Cousin sb.* and compared with F. *coosiner*, explained by Cotgrave, 1611, as 'to clayme kindred for advantage, or particular ends; as he, who to saue charges in travelling, goes from house to house, as cousin to the owner of euerie one', by Littré as 'faire le parasite sous prétexte de cousinage'. From this it is not far to a transitive sense 'to cheat, beguile, under pretext of cousinship': cf. also the phrase 'to make a cousin of' under *Cousin* 8. Still, the transition is not evidenced in our quotations for this vb.; and it is noteworthy that while in *cousin sb.* the ending -in predominates, this verb has sometimes -en, most commonly -en, the prevalent 17th. c. forms being *coosson*, *coosen*, *cousen*, the latter of which became the established form c 1710. In view of these difficulties, Mr. Smythe Palmer has suggested derivation from It. *cozzomare*, explained by Florio 1598-1611 as 'to play the horse-breaker or courser'. Also, to play the craftie knave', deriv. of *cozzome*, 'a horse-breaker, a horse-courser. Also, a craftie knave'. But this also presents difficulties, which the extant evidence is not sufficient to remove.]

1. The common name for decapod crustaceous animals of the tribe *Brachyura*; applied especially to the edible species found on or near the sea coast in most regions of the world. Also with qualifications applied to other Crustacea and Arachnida which more or less resemble these.

The common edible crab of Britain and Europe is *Cancer pagurus*; the small green, or shore crab is *Carcinus Maenas*; the edible or blue crab of the United States is *Callinectes hastatus*. Other genera of *Brachyura* are known as box-crab, calling-crab, fiddler-crab, lady-crab, land-crab, pea-crab, porcelain-crab, rock-crab, sand-crab, spider-crab, stone-crab, swimming-crab, etc. Black crab, a land-crab of the Antilles, *Gecarcinus rusticola*, so called from the marking of its carapace. The hermit-crab, palm-crab, soldier-crab, tree-crab, belong to the tribe *Anomura*. The horse-shoe, Moluccan, or king-crab is classed among the Arachnida. Glass-crabs are young transparent crustaceans of the families *Palaemonidae* and *Scyllaridae*. Crabs can move in any direction, and frequently walk sideways or backwards, to which characteristic frequent reference is made in language: cf. *crab-like*, *crab-sidde*, also CRABBED.

9. *pl. slang.* The lowest throw at hazard, two aces. To come off, turn out crabs: to turn out a failure or disappointment. [This may belong to CRAB sb.².]

A. LAWRENCE *Hagarene* iii (Farmer), My annuity drops with me; and if this throw comes off crabs, there won't be enough to bury me, unless I die a defaulter.

10. *Rowing.* To catch (rarely cut) a crab: to make a faulty stroke in rowing whereby the oar becomes jammed under water. The resistance of the water against the blade drives the handle against the rower's body with sufficient force (if the boat be in rapid motion) to throw him back out of his seat, and to endanger the capsizing of the boat.

The phrase prob. originated in the humorous suggestion that the rower had caught a crab, which was holding his oar down under water; it does not appear to have any historical connexion with the It. *pagliare un granchio* 'to catch a crab', to make a big blunder or complete mistake, 'toto cælo errare'; all the quotes. given by Manzoni for this phrase are *fig.*, of conduct, action, etc., e.g. 'In nessun'altra cosa l'uomo più erra, piglia più granchi, e fa maggior marroni, che nella cosa della guerra' (i.e. In no other thing does man err more, catch more crabs, and make greater blunders [*lit.* spades], than in the matter of war).

The phrase is not uncommonly applied, from similarity of result, to the action of missing the water with the stroke, or to any other action which causes the rower to fall backward; but this

(though found in Dictionaries from Grose onward) is an improper use by the uninitiated.

1785 GROSE *Dict. Vulgar Tongue* s.v. *Crab*, To catch a crab, to fall backwards by missing one's stroke in rowing. 1804 *Sporting Mag.* XXIII. 262 Catching crabs, that is, missing the hold they intend to take of the water with their oar. 1806 *Specif. C. Wilson's Patent* No. 2064. 4 It will clear itself of the water, so as the most inexperienced man can never what is technically called catch a crab, or impede the boat's motion by a resistance against the water in rowing. 1861 HUGHES *Tom Brown at Oxf.* i. When laying on your oars under sail, what should be done with them? A. Always fling them out of the rowlocks, and let them rest abaft in the gunwale. If they are left in the rowlocks, and...the loom of the oar were not kept...down, it would 'catch a crab'. 1867 SMYTH *Sailor's Word-bk.*, Catch a crab, in rowing, when an oar gets so far beneath the surface of the water, that the rower cannot recover it in time to prevent his being knocked backwards. 1880 *Times* 27 Sept. 11 3 A boat upset...because one of the rowers caught a 'crab'.

**Crab** (kræb), *sb.*<sup>2</sup> Also 5-7 *crabbe*; 6- *SCRAB*. [Of uncertain origin, appearing first in 15th c.]

A *Sc.* form *scrab*, *scrabbe*, is evidenced from beg. of 16th c., and may easily be much older. This is app. from Norse, as Rietz has *Sw. dial. skrabba* fruit of the wild apple-tree, and may be the original form. In that case *crabbe*, *crab*, would be a southern perversion, assimilated to *CRAB sb.*<sup>1</sup> But, on the other hand, this may be only a transferred use of that word: cf. the history and development of *CRABBED*, and the application of *crab* in various languages to a person. A fruit externally promising, but so crabbed and ill-conditioned in quality, might very naturally be so called; yet actual evidence of the connexion is wanting. (A *Sw. krabb-äple*, which has been cited, is merely the horticultural name of the American Crab-apple, *Pyrus Coronaria*, introduced with the shrub from the United States.)

The primary reference was to the crooked or wayward gait of the crustacean, and the contradictory, perverse, and fractious disposition which this expressed. Cf. Ger. *krabbe* crab, whence, according to Grimm, 'because these animals are malicious and do not easily let go what they have seized, LG. *ene lütje krabbe* (a little crab) a little quarrelsome ill-conditioned man (*Bremen Woch.*); also in Saxony said of self-willed, refractory children. Literal senses of 'cross-grained, crooked', and 'knotted, gnarled, unsmooth', applied to sticks, trees, and the like, also appear; these re-act upon the sense in which the word is applied to persons and their dispositions. In later use there is association with the fruit, giving the notion of 'sour-tempered, morose, peevish, harsh'.]

**Cracous**: see CRACOUS.

**Cracy**, formerly also *-cratie*, *-crasie*, a. F. *-cratie* (-krasi), ad. med. L. *-cratia*, a. Gr. *-κρᾱτῖα*, in composition 'power, rule', f. *κράτος* strength, might, rule, authority. Already used in Greek in *ἀριστοκρατία* aristocracy, rule of the best-born, *δημοκρατία* democracy, popular government, *ὀλιγοκρατία* ochlocracy, mob-rule, *πλουτοκρατία* plutocracy, an oligarchy of wealth, *θεοκρατία* theocracy, rule of God; whence ANGELOCRACY, government by angels, *bestiocracy* (*The Times* 21 Nov. 1863) the rule of beasts. All these have a preceding *o* belonging to or representing the stem vowel of the first element, but which tends to be viewed as part of the suffix, as if this were *-ocracy*. The word *aristocracy* has in modern times, in Fr. and Eng., passed into the senses of 'a ruling body of nobles, the nobles as a ruling class, political power, or upper class', after which *democracy* has received the sense of 'the people or lower class as a political power or element', and *plutocracy* that of 'a class ruling or influential by virtue of its wealth'. Hence the suffix, in the form *-ocracy*, has been added to English words, to designate in mockery or ridicule any dominant, superior, or aspiring class, as in the following (mostly colloquial or newspaper words); *barristerocracy*, *brokerocracy*, *capocracy*, *millocracy*, *shipocracy*, *shoddyocracy* (barristers, brokers, cap-setting women, mill-owners, ship-owners, shoddy-manufacturers, as classes of social standing or pretensions); see also *BEEROCRACY*, *CLUBOCRACY*, *COTTONOCRACY*, *COUNTYOCRACY*, *MOBOCRACY*, *SNOBOCRACY*, *SHIPOCRACY*, *SLAVEOCRACY*, etc.

† **Cradden**, -on, sb. and a. Obs. exc. dial. Also 6-7 *Sc. ora-*, *orawdown*; 8-9 dial. *craddant*. From this, *OE. cradol*, *cradil* might be a diminutive formation, lit. 'little basket': cf. mod. *bassinet*. The various Celtic derivations conjectured, e.g. from Welsh *crŷd*, 'shake, shakes, ague', now also in N. Wales 'cradle', from Gael. *crathall* (kr'al), *cradle*, etc., have no etymological value. *Crathall* sometimes erroneously cited as Irish, is a bad spelling of Gael. *crathall*, given by O'Reilly from Shaw.]

V. Applied to boats, ships, and fishing requisites.

[These uses were probably colloquial with watermen, fishers, and seamen some time before they appeared in print, so that the history is not evidenced; but the expression is probably elliptical, sense *g* being = vessels of small craft, i.e. small trading vessels, or of small seaman's art, and sense *ro* = requisites of the fisherman's craft. It is not impossible that the latter was the earlier: cf. quot. 1704 in *ro*. The want in English of any general collective term for all sorts of 'vessels for water carriage' naturally made *craft* a useful stop-gap.]

*Cran*<sup>1</sup> (kræn). Sc. [Of uncertain etymology: *crann* is used in Gaelic in same sense, and it has been suggested that it is the Gaelic *crann* 'lot', and was applied orig. to the 'lot' or share of fish that fell to each man engaged.] A measure of capacity for fresh herrings as caught; fixed by the Fisheries Board at 37½ gallons (about 750 fish).

Up to 1815 the *cran* was measured by heaping full a herring-barrel with the ends taken out, which was then lifted, leaving the heap on the ground or floor. In 1816, the Commissioners for the Herring Fishery fixed the capacity of the 'cran' at 42 gallons, Old Wine Measure, which in 1832 was raised to 45 gallons, 42 gallons when 'pined' being found insufficient to make a barrel of bung-packed herrings. In 1852 the con-

tents were given in Imperial measure as 37½ gals., making, when pined, a barrel of 30 gals.

As to its introduction into England, see sense 1.]

1. The fruit of a dwarf shrub, *Vaccinium Oxycoccus*, a native of Britain, Northern Europe, Siberia, and N. America, growing in turf bogs: a small, roundish, dark red, very acid berry. Also the similar but larger fruit of *V. macrocarpon*, a native of N. America (*Large* or *American Cranberry*). Both are used for tarts, preserves, etc. The name is also given to the shrubs themselves.

The name appears to have been adopted by the North American colonists from some LG. source, and brought to England with the American cranberries (*V. macrocarpon*), imported already in 1686, when Ray (*Hist. Pl.* 685) says of them 'hujus baccae a Nova Anglia usque missas Londini vidimus et gustavimus. Scribitis seu ortis (*Tartis nostrates* vocant) eas inferciunt'. Thence it began to be applied in the 18th c. to the British species (*V. Oxycoccus*). In some parts, where the latter is unknown, the name is erroneously given to the cowberry (*V. Vitis Idæa*).

1. A large grallatorial bird of the family *Gruidæ*, characterized by very long legs, neck, and bill. The name belongs originally to the common European crane, *Grus cinerea*, of an ashy-gray colour, formerly abundant in marshy places in Great Britain, and prized as food, but now extinct; about 15 closely-allied species are found in other lands.

Among these are the common American or Sand-hill Crane (*G. canadensis*), and Whooping Crane (*G. americana*). The Crown Crane or *Demoiselle*, Numidian, and Stanley Crane of Africa belong to allied genera. The Adjutant or Gigantic Crane is a species of Stork.

1. A thin transparent gauze-like fabric, plain woven, without any twill, of highly twisted raw silk or other staple, and mechanically embossed, so as to have a crisped or minutely wrinkled surface. The name originally comprised fine worsted fabrics (see b.); but it is now chiefly limited to a black silk (or imitation silk) fabric much used for ladies' mourning dresses, and for funeral trimming and draping.

Sometimes specifically called *English crape* (*crêpe anglais*). For similar fabrics of other colours or material the French form *Crêpe* (which has retained the wider meaning of the word) is now used by preference, though the English form also occurs with qualifications, as in *Canton* or *China crape* = *crêpe de Chine*, *crêpe-lesse* = *Crêpe lisse*, a kind of crape without any wrinkling or 'figure'; see also *crape-cloth* below. The 'crape' for which Norwich was formerly famous, was a plain cloth of silk warp and worsted weft, which afterwards degenerated into *bombazine*: see the latter word (quots. 1789-1831).

**Cranch, cranch** (krānʃ, krānʃ), *v.* [*Cranch* appears after 1600; in early use it varied with *scranch*, still given by Johnson, 1755, as retained by the Scots, and now dialectal. As in other words where initial *cr-* and *scr-* interchange (cf. *crab, scrab, crap, scrap, cratch, scratch*), it is doubtful which of these is the original. The priority of *scranch* is favoured by its nearness in form and sense to some Du. and L.G. words. Cf. 16th c. Du., in Plantijn 1573, *schransen* to split, break,

evidently related to MHG. *schrans* breach, split, crack, rent; in Killian 1599 *schransen* to break, tear, crush, bruise; also to chew, crush with the teeth, to comminute or grind (the food) with the teeth; mod. Du. *schransen* to eat voraciously, W.Flem. *schransen* to gnash, eat with gnashing of the teeth, to craunch; also Efris. *schransen, schranssen*, to tear or snatch to oneself, to eat greedily.

On the other hand, earlier examples are at present known of *cranch*, and this may, as in the parallel pair *crunch, scrunch*, be really the earlier form. *Cranch* might be an onomatopoeic modification of *crash*, which was used in the very same sense from 16th to 18th c.: see *quot.* 1730 from Bailey's Folio. That association with *crash, crush*, has affected the word, is evidenced by the later form *crunch*. The original pronunciation was as in *branch*; the occasional pronunciation as in *paunch* is due to the spelling with *au* (chiefly since Johnson), with the obsolescence of the word in living use: cf. Thoreau's spelling *crunch*.]

1. An article of dress worn round the neck, chiefly by men.

It came into vogue in France in the 17th c. in imitation of the linen scarf worn round their necks by the Croatian mercenaries. When first introduced it was of lace or linen, or of muslin edged with lace, and tied in a bow with long flowing ends, and much attention was bestowed upon it as an ornamental accessory. In this form it was originally also worn by women. More recently the name was given to a linen or silk handkerchief passed once (or twice) round the neck outside the shirt collar and tied with a bow in front; also to a long woollen 'comforter' wrapped round the neck to protect from cold out of doors.

1856 BLOUNT *Glossogr.*, *Crabbat* (Fr.). is often used Substantively for a new fashioned Gorget which women wear [1674 (ed. 4) *Crabat* (Fr.) is of late well known with us to be that Linnen which is worn about Mens (especially Souldiers and Travellers) Necks, in stead of a Band]. 1658 *Wit Restored, Burse of Reform.* (Fairholt), Pray you Madam

Craven (krā'v'n), a. and sb. Forms: 3, 7 *cravant* (crau-), 5 *crauaunde*, 6 *cravine*, -yne, 7 *cravand*, 6- *craven*. [In early ME. *crauant* (rare), etymology obscure.]

Mr. Henry Nicol (*Proc. Phil. Soc.*, Dec. 1879) suggested its identification with OF. *crauant*, *crauant*, crushed, overcome: see CRAVENT v. But the total absence of the final *e* from the word, at a date when English still retained final *e*, makes a difficulty. Others have considered it a variant, in some way, of CRANT (OF. *crant*, *crant*), which is a much

more frequent word in the same sense in ME. The difficulty here is to account for the *v* (w), for which popular association with CRAVE v. and its northern pa. pples. *craued* has been conjectured.]

*Crawl* (krōl), v. 1 Forms: 4 *croul*, *croul*, *croul*, 4-7 *craule*, *crawle*, 5-6 *craul*, 7 *craul*, 7-*crawl*. [A rare word in M.E. and apparently only northern; prob. from Norse: cf. Da. and Norw. *kraule* to crawl, climb up, Sw. *kraula* to grope, Icel. *kraula* to paw or scabble with the hands (mod. Icel. *kraula fram úr* to crawl out of). The word existed also in West Germanic, but the corresponding OE. form \**craflan* has not been found.

To Norse *kraula* corresponds an OLG. \**kraulōn*, whence 15th c. HG. *kraulen*, *kraulen* to crawl, creep, still used in various HG. dialects, but now replaced in mod.G. by *kraulen* (see Kluge). The word is a frequentative from an OTeut. vb. stem \**kra-*: *kra-* to scratch, claw, paw: cf. CRAW v. 2 and see Grimm *kraulen*, *kraulen*.

The diphthongal M.E. *craule*, *crawle* (from *craule*), was reduced to *craul* by end of 13th c., riming with *small* in Spenser: cf. the form-history of AWL. But the phonology of the early forms *craule*, *craule*, *craule*, *craul*, is obscure; *craule* reminds us of M.Du. *cræulen*, but *craule*, *craul*, suggests some confusion with CRAWL, Fr. *crawler*: see esp. sense 6.
